

AI HACKATHON PAKISTAN 2026 • OFFICIAL PITCH DECK

Legal Saathi (لیگل ساتھی)

AI-Powered Bilingual DIY Legal Document Generation Platform for Pakistan

Democratizing access to court-compliant, lawyer-verified contracts in Urdu (Nastaliq) and English with instant E-Signatures, Pakistani Statutory AI, and automated stamp duty calculations.

Next.js 14 App Router

Live on Vercel Serverless Edge

ASP.NET Core 8 API

Live on MonsterASP Cloud

Pakistani Statutory AI

Groq LLaMA 3.3 + Offline Codex

Why Legal Documentation in Pakistan is Broken

Exorbitant Lawyer Fees

Drafting basic everyday agreements (rent, affidavits, partnerships) costs Rs. 5,000 – 25,000+ through traditional channels, excluding 80%+ of citizens and startups.

The English Monopoly & Language Barrier

Official contracts and statutes are written in archaic, complex English, alienating the majority of Pakistanis who negotiate and transact in Urdu.

Defective Stationery–Shop Deeds

Citizens buy generic, outdated paper deeds near local courts that routinely fail in civil litigation due to ambiguous and non-compliant clauses.

Stamp Duty Confusion & Invalidation

Calculating provincial stamp paper values (Punjab, Sindh, KPK, ICT, Balochistan) is confusing, causing under-stamped, legally unenforceable agreements.

The Legal Saathi 4-in-1 LegalTech Solution

01

Bilingual DIY Generator

Guided questionnaire compiling court-compliant contracts in Urdu (Nastaliq) & English with real-time preview.

02

Pakistani Legal AI

AI advisor trained on the Contract Act 1872, Property Act, & NADRA Succession Act 2021 with offline fallback.

03

ETO 2002 E-Signatures

Legally binding digital signatures with SHA-256 tamper-evident sealing & OTP identity verification.

04

Provincial Stamp Engine

Automated duty & e-Stamping calculator for Punjab, Sindh, KPK, Islamabad, and Balochistan.

Enterprise Full-Stack Architecture

Frontend Presentation

- Next.js 14 App Router (React 18)
- TypeScript 5.x & Tailwind CSS
- Bidirectional Urdu Nastaliq Typography
- Client-Side CNIC & Phone Masking
- Deployed on **Vercel Edge**

Backend REST Engine

- ASP.NET Core 8 Web API
- JWT Bearer + Secure HttpOnly Cookie
- Centralized Error Middleware
- Zero-Secret DotEnvLoader Config
- Deployed on **MonsterASP Cloud**

Data & Synthesis Layer

- Cloud MS SQL Server 2022
- 100% Parameterized Pure ADO.NET
- QuestPDF (RTL Vector Font Embedding)
- OpenXML SDK (.docx Word Output)
- Groq LLaMA 3.3 70B AI Engine
